

Bake Sale Math

We're having a bake sale! Help the students by solving the word problems below. You will need to either add or subtract to find a solution.

Sarah made cookies for the school bake sale. She baked 12 chocolate chip cookies and 18 oatmeal raisin cookies. How many cookies did Sarah make all together?

Felix made 3 pans of brownies. Each pan had 10 brownies. How many brownies did Felix bake in all?

Bruce and Lilly each made fudge for the bake sale. Bruce wrapped 14 squares of fudge. Lilly wrapped 25 squares of fudge.
Who wrapped more?
How many more?

Sam brought lollipops to sell at the school bake sale. There were 5 red lollipops, 7 orange lollipops, 3 yellow lollipops, 6 pink lollipops, and 12 blue lollipops.

How many lollipops were there all together?

How many more blue lollipops were there than yellow?

How many red and orange lollipops were there all together?

How many fewer red lollipops were there than pink?
