

# Expand The Numerals

Write the expanded form of each numeral as per the example.

$$565 = \underline{500} + \underline{60} + \underline{5}$$

1.  $520 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

6.  $718 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

2.  $354 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

7.  $321 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

3.  $927 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

8.  $524 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

4.  $555 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

9.  $877 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

5.  $789 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

10.  $142 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

Write the numeral as per the example.

$$400 + 20 + 7 = \textcolor{red}{427}$$

1.  $600 + 10 + 5 = \underline{\hspace{2cm}}$

6.  $100 + 10 + 2 = \underline{\hspace{2cm}}$

2.  $200 + 50 + 8 = \underline{\hspace{2cm}}$

7.  $300 + 50 + 6 = \underline{\hspace{2cm}}$

3.  $900 + 20 + 6 = \underline{\hspace{2cm}}$

8.  $400 + 90 + 4 = \underline{\hspace{2cm}}$

4.  $700 + 70 + 7 = \underline{\hspace{2cm}}$

9.  $500 + 10 + 5 = \underline{\hspace{2cm}}$

5.  $800 + 90 + 1 = \underline{\hspace{2cm}}$

10.  $200 + 60 + 6 = \underline{\hspace{2cm}}$
