

Carpet Python

Habitat: rainforests, islands, woodlands, and rivers of New Guinea, Australia, and Indonesia

Size: 6½-13 feet long, up to 33 pounds

Lifespan: 15-30 years

Eats: small mammals, bats, birds, and lizards

• • • • •
Carpet pythons climb trees, are nocturnal, bask on rocks, and can be found on the forest floor.

The females are bigger.

They are olive green to black with white, cream, or gold markings.
