CHEMICAL vs. PHYSICAL PROPERTIES

Read about the two different types of properties in the boxes below.
Then write each property in the appropriate box.

Chemical

Properties that change
the makeup of a substance.

Properties

color

smell

reactivity
with water

boiling point

acidity

magnetic
attraction
or repulsion

rusting

heat of
combustion
(breaking down)

radioactivity

Physical

Properties that do not
change the makeup of
a substance, only its
appearance.
