Christmas Village

- **1.** Color in the buildings and cut them out along the bold lines.
 - **2.** Cut out the stand.
- **3.** Fold the outer flaps of the stand along the dotted lines.
- **4.** With the flaps facing out, attach the stand to the back of the building with a piece of tape or glue.
- **5.** When the tape is set or the glue dries, you can set it up in a window or on a table for a festive touch!

You can use small toys or dolls to live in your holiday village, and make snow with small bits of scrap paper or cotton balls.
