

CHRISTMAS WORD PROBLEMS #19

Solve the following word problems.

At a Christmas party, there are 4 girls, 5 boys and 7 adults. How many party-goers are there in all?

There are 16 boys and girls singing Christmas songs. If 4 singers go home, how many are left now?

There are 3 little girls playing in the snow. If each girl is wearing 2 mittens, how many mittens are there in all?

Tommy goes to bed at 8:00 p.m. on Christmas Eve and wakes up at 6:00 a.m. to open his presents from Santa. How many hours did Tommy sleep?

A kindergarten class visits a Christmas fair. If 5 of the children buy wreaths, and twice as many buy ornaments, how many children buy ornaments?
