

CHRISTMAS WORD PROBLEMS #5

Solve the following word problems.

Alex asks for 13 toys in his letter to Santa. His friend Nick asks for 6 toys in his own letter. How many toys do the boys ask for in all?

A pastry chef adds 5 walnuts, 7 pecans and 4 cranberries to her Christmas fruitcake. How many ingredients does she add in all?

Gwen has 18 chocolates in her Christmas stocking. She eats 7 of them in the morning. How many chocolates are left in her stocking?

A class of 21 students begins drawing Santa Claus. Only $\frac{1}{3}$ of the students finish their drawings before class ends. How many students didn't finish their drawings?

Monica and her brother Charles decorate their home for Christmas. If there are 17 decorations in all, and Monica puts up 8, how many decorations does Charles put up?
