## Co-Craft Situations: A Word Problem Activity

Directions: Write or paste an expression, visual, graph, or other mathematical representation your teacher provides in Box A. Complete Box B–E based on the information in Box A.

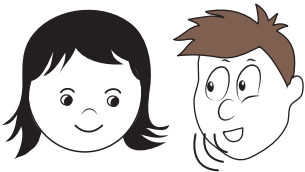

Box A: Look at the information. Solve the expression if applicable.

Box B: Draw a picture or model to represent the information in Box A.

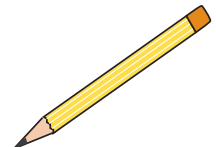

Box C: Write a problem using the information from Box A.

Box D: Discuss Boxes B and C with your partner. Share your information. Then, ask clarifying questions about your partner's information, like:

Why would you add this detail?  
What other information relates to the topic?  
Do you have specific numbers or facts you can share?  
Why would you add \_\_\_\_\_?  
Can you give me more details about \_\_\_\_\_?

Write down notes or suggestions your partner gave you to improve your word problem or visual.

Box E: Imagine you're speaking to a younger learner. Write how to solve your word problem. (Hint: use sequencing words, such as "First," "Next," and "Then.")
