# ARRAYS AND THE COMMUTATIVE PROPERTY 

Directions: Write the equation for each array when it is flipped 90 degrees. See the example below for guidance.

EXAMPLE: This array represents the equation $5 \times 2=10$.
What equation does the array represent when it is rotated 90 degrees? $\underline{2} \times \underline{5}=\underline{10}$
$5 \times 2=10$

$2 \times 5=10$
