

# Cross Sections of Three-Dimensional Figures

Use the space below each problem to draw the shape of the cross section.  
*You can assume planes are perpendicular or parallel if they appear to be.*

**Challenge!** Draw the shapes of *two* different cross sections that could be created by a vertical or horizontal plane that intersects this three-dimensional figure.

	<p><b>Cross Section 1:</b></p>	<p><b>Cross Section 2:</b></p>
