Cuttlefish

Cuttlefish are cephalopods, which means they come from the same family as octopus and squid. They can camouflage themselves to better blend in with their surroundings and hide from predators. Cuttlefish are not actually fish—they are mollusks.

Directions:

1. Cut out the cuttlefish's head on page 1 along the dotted line.
2. Cut out the two paper strips on this page, along the dotted line.
3. Tape the ends of the paper strips to each side of the cuttlefish cutout where the tabs say, "tape here."
4. Hold the headband up to your forehead and adjust the strips to fit around your head, and then tape them together.
