

Cut-n-Count Dice

Have a grown-up help you cut out, fold and tape together the two dice.

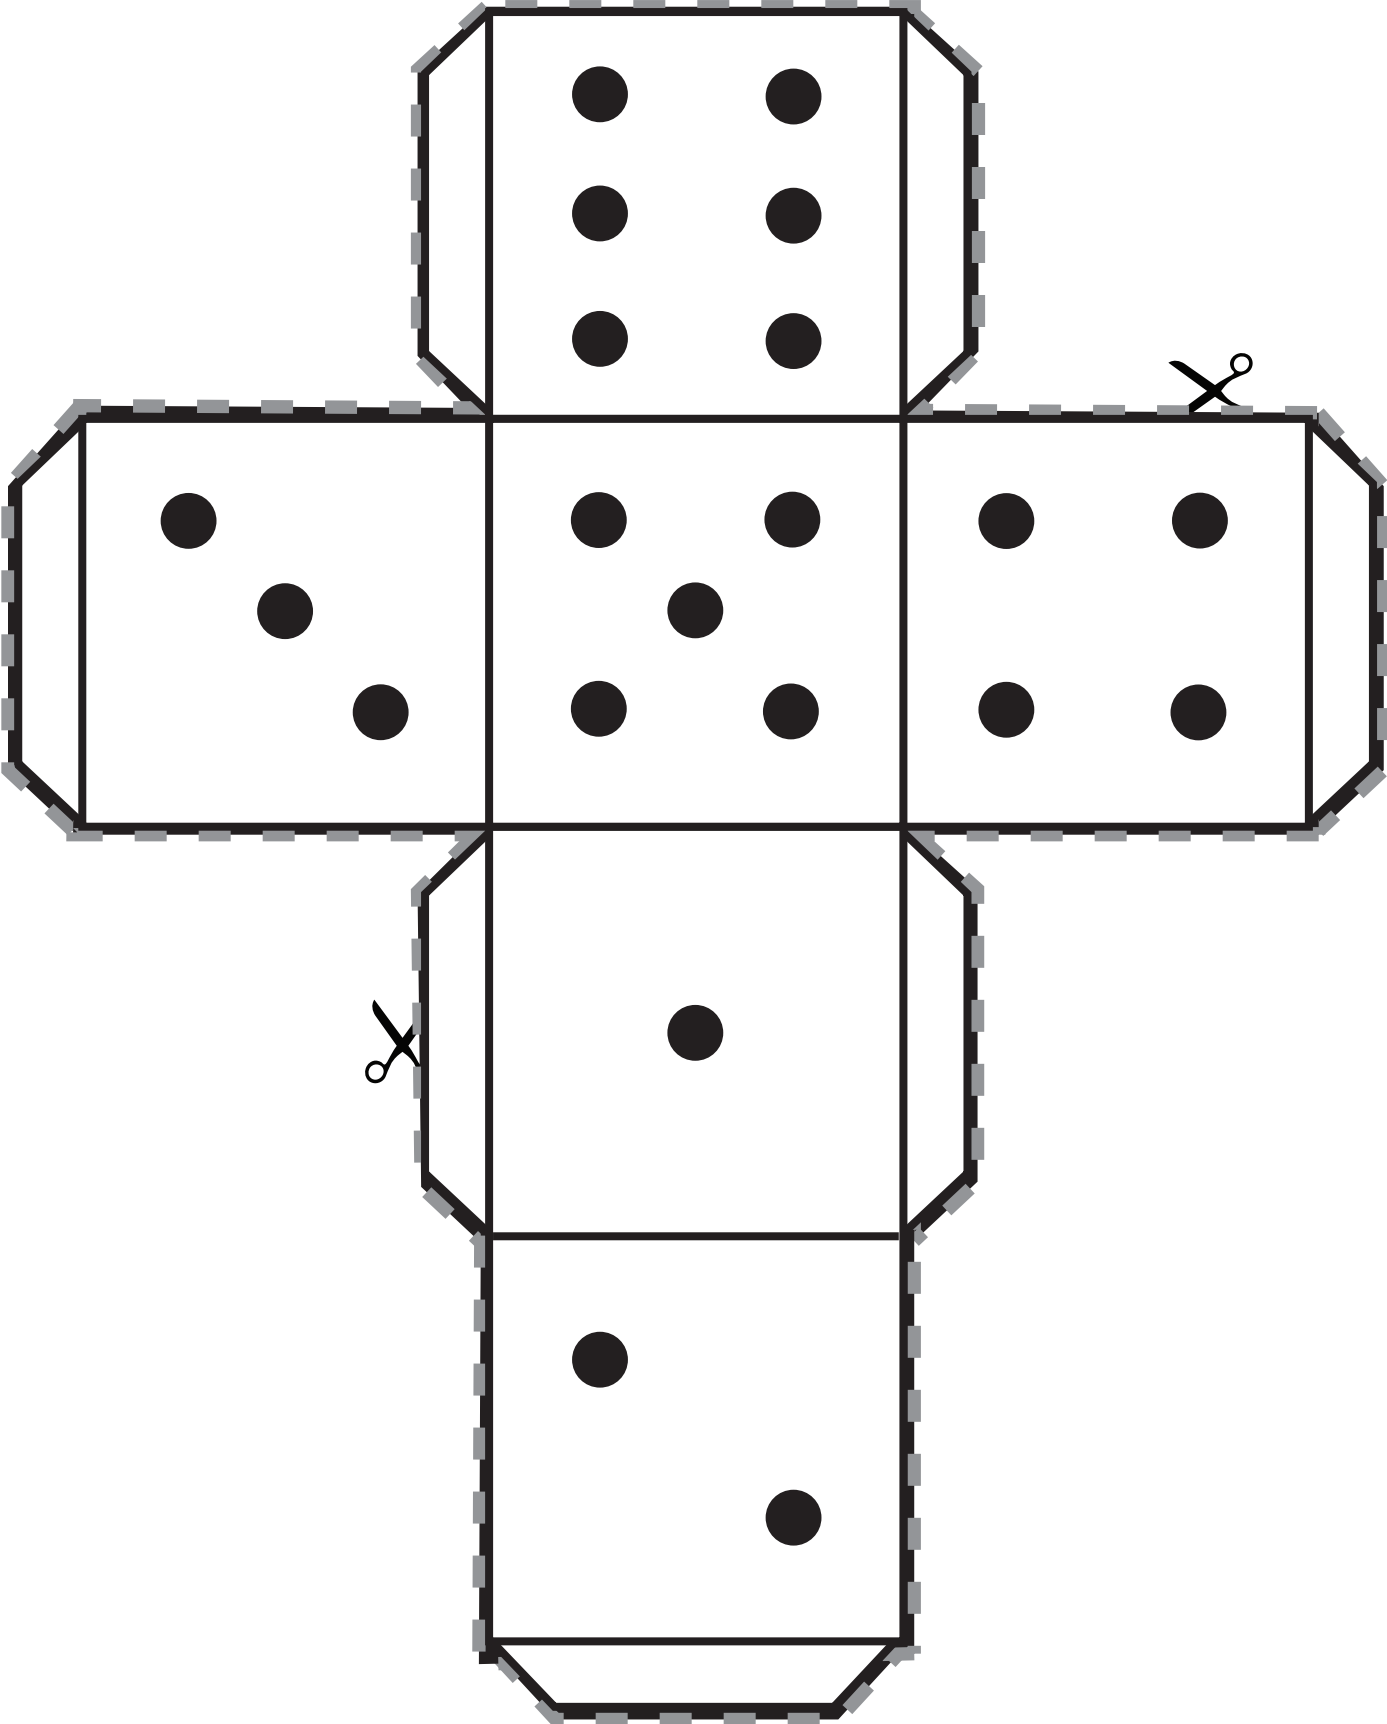

Then use the dice to practice counting and basic math logic together!

Dice Games

- Count up the dots on each side of the dice. Why do you think there are a different number of dots on each side?
- Count how many dots are there on one die IN ALL.
- Take turns throwing each die and count up the dots that are showing.
- Try throwing both dice at once and counting up all the dots that show on both of them IN ALL.
- Throw both dice at once and see who gets the higher number.
- See how many throws it takes for you to get the same number on each die!
