DIGIT JUGGLER #5

Learning to juggle is tricky, but all it takes is practice. Use the numbers given to write the correct subtraction problem. Start with the right-most digits and work to the left. Show your work.

4 ✓
6 ✓
9 ✓

Start by finding subtraction combinations that equal 8. Use trial and error to see if you have the right numbers left over.

12-4 14-6

$$3\,9\,.\,4$$
$$-\,2\,2\,.\,6$$
$$\overline{1\,6\,.\,8}$$

9 - 2 = 7 (+1)

If you use borrowing, add 1 to the next digit of the answer in order to make it ease to solve
