## Cricket

Everybody loves to watch and play cricket in India. It's one of the most popular games played at all levels and ages. The game is played in a circular or oval shaped grassy ground. There are two teams with 11 players on each team. The batsman tries to hit the ball after it is bowled by the bowler for the fielding team and tries to switch positions without getting an out to score points. As in most field games, the goal of cricket is to score points against the opposing team by running from one point to another before the play can be ended or getting run out by the defenders.
