

DIVISION WORD PROBLEM CARDS

Directions: Cut out the cards and have students work on these division word problems with a partner.

1. There are 135 students and chaperones going on the field trip and 3 buses available. How many people will go in each bus if they are distributed equally?

2. Hannah has 78 yards of flannel fabric. She wants to make baby blankets to donate to a hospital. If each blanket can be made with 2 yards of fabric, how many baby blankets can she make?

3. The school purchased 360 new books to be split evenly between the 6 fourth grade classes. How many books will each class receive?

4. Dwayne collected 76 pieces of candy on Halloween. He wants to share his candy with his friends. If he splits the candy evenly between his 3 friends and himself, how many pieces will each person get?

5. Sam made 112 oatmeal raisin cookies for the bake sale. Each bag can fit 4 cookies. How many bags will he need to pack all the cookies he baked?

6. The third grade parents collected \$245 to buy gift cards for the teachers for Teacher Appreciation Week. There are 7 teachers that teach third grade. How much money will go on each gift card?

7. Karla wants to buy a new video game that costs \$62. She gets an allowance from her family every week for doing chores. If she saves \$2 a week, how many weeks does she need to save until she has enough to buy the video game?

8. In the soccer tournament, 108 players are divided into teams. Each team must have 6 players, including the goalie. How many teams will participate in the tournament?

9. The Sanchez family went apple picking. They collected 252 apples in 3 hours. All the apples need to fit in the 9 boxes they brought with them. How many apples will fit into each box?
