

# Dizzy Over Decimals:

## Dividing Decimals #3

Solve the following division problems. Before you divide, remember to make the divisor a whole number by multiplying both the divisor and dividend by the same power of 10.

$$0.3 \overline{)1.92}$$

$$0.4 \overline{)82.8}$$

$$0.2 \overline{)37.1}$$

$$0.6 \overline{)21.3}$$

$$0.8 \overline{)9.76}$$

$$0.3 \overline{)5.64}$$

$$0.4 \overline{)2.87}$$

$$0.25 \overline{)0.45}$$

$$0.6 \overline{)76.2}$$

$$0.4 \overline{)0.18}$$

$$1.7 \overline{)41.14}$$

$$0.45 \overline{)6.3}$$

$$0.08 \overline{)5.18}$$

$$0.05 \overline{)0.337}$$

$$3.4 \overline{)2.89}$$

$$6.4 \overline{)278.4}$$
