

Complete the following algebra equations.

Remember:
what you do to one side of the equation,
you have to do to the other side.

ex.

1. $2x - 3 = 15$

$2x - 3 + 3 = 15 + 3$

$2x = 18$

$2x/2 = 18/2$

$x = 9$

2. $12 + x = 33$

3. $2x + 5 = 25$

4. $6 + 3x = 18$

5. $3x - 1 = 20$

6. $2x - 4 = 22$

7. $10 + x = 14$

8. $7 + 2x = 29$
