

Make 60

There are 60 minutes in an hour. Let's look at that number more closely so that we can see how it is divided up.

Factors of 60

$$1. 2 \times \underline{\quad\quad} = 60$$

30 minutes

Now do the rest on your own:

$$2. 4 \times \underline{\quad\quad} = 60$$

minutes

$$3. 6 \times \underline{\quad\quad} = 60$$

minutes

$$4. 12 \times \underline{\quad\quad} = 60$$

minutes

$$2. 60 \times \underline{\quad\quad} = 60$$

minutes
