## Find the Multiples

You can find a multiple of a number by multiplying it by a whole number.

Let's try finding the first few multiples of 4.

$$
\begin{aligned}
& 4 \times 1=4 \\
& 4 \times 2=8 \\
& 4 \times 3=12 \\
& 4 \times 4=16
\end{aligned}
$$

So, the first four multiples of 4 are $4,8,12$, and 16.

List the first four multiples of each given number.
