

Finding the Circumference of Circles

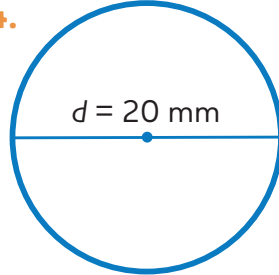

You can find the circumference of a circle using the formula $C = \pi d$, where d is the diameter of the circle, or the formula $C = 2\pi r$, where r is the radius of the circle.

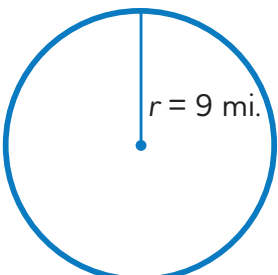

Try it! Find the circumference of each circle below. Use 3.14 for π .

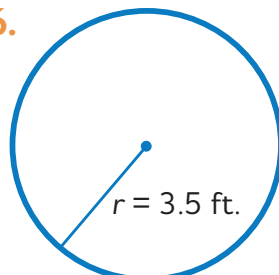

1.  $d = 3 \text{ in.}$
 $C \approx$ _____

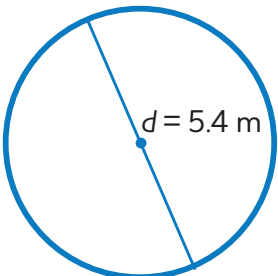

2.  $r = 5 \text{ cm}$
 $C \approx$ _____

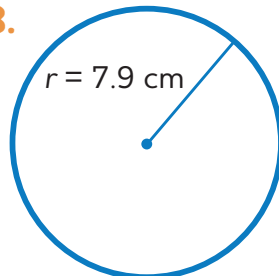

3.  $d = 14 \text{ ft.}$
 $C \approx$ _____

4.  $d = 20 \text{ mm}$
 $C \approx$ _____

5.  $r = 9 \text{ mi.}$
 $C \approx$ _____

6.  $r = 3.5 \text{ ft.}$
 $C \approx$ _____

7.  $d = 5.4 \text{ m}$
 $C \approx$ _____

8.  $r = 7.9 \text{ cm}$
 $C \approx$ _____
