

# Design your own Fireworks

Ask your child to complete the skyline scene on the next page by tracing over the dotted lines with different colors and pasting shapes to create fireworks. First ask your child to trace over the lines in different colors to bring the fireworks to life. Then ask him to draw windows and more buildings to complete the skyline. Finally he can cut out these shapes to design his own rockets, then color the picture.

You can also ask your child to draw their own shapes to bring the firecrackers to life.
