

A Folding for Common Angles

Name _____

Date _____

1. 	2. 
3. 	4. 
5. 	

Paper model folding steps:

1. Fold upper left corner towards right side so that the top is parallel to the right side. (see example #2 above)
2. Fold the upper right tip, over to the left side triangle tip. (see example #3 above)
3. Fold the shape down the middle for a mirror image. (see example #4 above)
4. Open up the paper and trace the folded lines with a ruler. (see example #5)
