

# Fulvous Whistling Duck

**Habitat:** lakes, freshwater marshes, ponds, swamps, and irrigated fields of Africa, Asia, southwestern USA, South America, and Mexico

**Size:** 18-21 inches long  
1-3 pounds

**Lifespan:** about 20 years

**Eats:** grass seeds, rice seeds, fruit, and vegetation

These ducks live in small groups but also sometimes form large flocks.

Mother ducks will sometimes put their eggs in other birds' nests.

They will socialize with other animal species.
