

Further vs. Farther

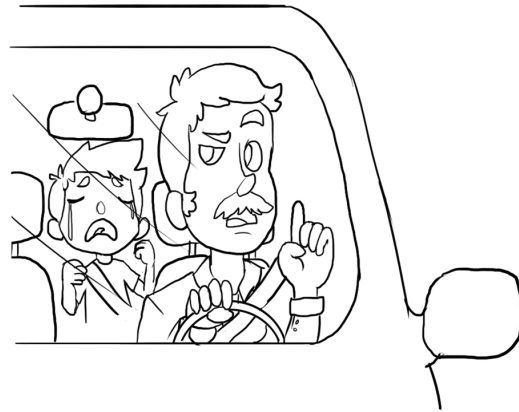

Use farther to talk about physical distance, like miles.

Use further to show “metaphorical” distance that has passed, like time.

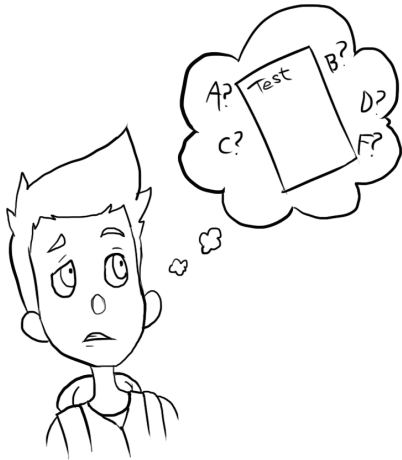

1. Her house is a little (further/farther) up the road.

2. If this silliness goes any (further/farther) I’m going to turn this car around!

3. I can’t go on any (further/farther) not knowing how I did on that test.

4. We need to catch up! The other team got about 10 miles (further/farther) than us.

5. The rousing speech he gave on Monday only (furthered/farthered) his chances of winning.
