Get Creative with Hexagons!

A **polygon** is considered regular when the sides and angles are equal.
An **irregular polygon** contains sides or angles that are not equal.

Directions: Use 3 regular hexagons and 5 irregular hexagons to create a picture. Color the regular hexagons yellow and the irregular hexagons red. Include at least 5 more irregular polygons in your picture.

What additional irregular polygons did you include?

_____

_____

How do you know they are irregular?
