

# GLOSSARY FOR EL SUPPORT LESSON PLAN:

## DECIMAL PLACEMENT WITH DIVISION

Word	Definition	Visual	
dividend	the number in an expression being divided or separated	$\begin{array}{r} 4.3 \\ 2 \overline{) 8.6} \leftarrow \text{dividend} \\ \underline{-8} \phantom{0} \\ 06 \\ \underline{-6} \\ 0 \end{array}$	
divisor	the number in an expression that shows the number of groups to divide the dividend	$\begin{array}{r} 4.3 \\ \text{divisor} \rightarrow 2 \overline{) 8.6} \\ \underline{-8} \phantom{0} \\ 06 \\ \underline{-6} \\ 0 \end{array}$	
quotient	the result of a division problem	$\begin{array}{r} 4.3 \leftarrow \text{quotient} \\ 2 \overline{) 8.6} \\ \underline{-8} \phantom{0} \\ 06 \\ \underline{-6} \\ 0 \end{array}$	
value	how much a number is worth based on its placement in the place value chart		
place value chart	a chart used to list periods and values for numbers		
digit	a whole number
