

GLOSSARY FOR EL SUPPORT LESSON PLAN:

EXPLORING METRIC UNITS OF LENGTH

Word	Definition	Visual	
centimeter	a small length, equal to 1/100 meter	 <p>A ruler with markings for millimeters and centimeters (1, 2, 3, 4 cm). A fly is positioned above the 1 cm mark, with a bracket labeled "1 centimeter" above it.</p>	
measure	to find out the size, length, or amount of something	 <p>A ruler with markings for millimeters and centimeters. A 25-cent coin is placed above the ruler, and a double-headed arrow above it indicates its length is 25 mm.</p>	
meter	basic metric unit of length equal to about 39.37 inches	 <p>A ruler with markings for millimeters and centimeters. A dog is standing above the ruler, illustrating its length relative to the metric units.</p>	
millimeter	a very small length, equal to 1/1000 meter	 <p>A ruler with markings for millimeters and centimeters (1, 2 cm). An ant is positioned above the first millimeter mark, with a bracket labeled "1 millimeter" above it.</p>	
length	the measurement of something end to end	 <p>A ruler with markings for millimeters and centimeters. A bus is positioned above the ruler, with a double-headed arrow above it indicating its full length.</p>
