

Claire's Bake Sale

PRACTICING LINE GRAPHS

Claire has a bake sale every month. She sells custard cupcakes and chocolate chip cookies. She finds it too much trouble to bake both, so she wants to just stick to one item. Make a line graph of her sales to see which one is the more profitable item to sell.

	MAY	JUNE	JULY	AUGUST	SEPTEMBER
CUPCAKES	\$10	\$15	\$25	\$20	\$25
COOKIES	\$5	\$20	\$30	\$30	\$40

DIRECTIONS:

- 1) Title your line graph!
- 2) Figure out a scale to track her sales of cupcakes and cookies.
- 3) Graph the data.
- 4) Use two different colors for the lines.
