

Let's Grow, Grow, Grow!

Plants are living things that need the air, water, and sun to make their food. There are many plants on the island that we discovered. This experiment will show you how plants grow. You'll also get to keep track of your plant's growth!

Materials Needed

- a few dry beans
- small amount of potting soil
- plastic bag (sandwich size, re-sealable)
- water
- strong tape or clothespins and thick string
- recording sheet

Write the date on your baggie.

Have your grown up place about $\frac{3}{4}$ cup potting soil in the baggie. Gently place a few beans in the soil and add a tiny bit of water. Hang the baggie in a window using the tape or with the clothesline and string.

Draw a picture of your plant baggie in the first box as it appears now. Be sure to write the date in the box too! Every couple of days, draw a new picture in the next box, showing how your plant has grown and changed. Don't forget to write the date in those boxes as well.

Here is what my plant looks like:
