

Hole-y Microbes!

Andy's biology notes are a mess! There are missing words on his notebook.
Help Andy by using the words below to fill in the spaces.

I looked through my _____ today
and spotted several _____. I saw
a _____, which is an amazing
single-celled creature. It moves by extending part of
its goo into a false foot, or a _____.
I saw one-celled algae that create pretty glass shells
called _____. When they die, they
pile up and collect to form _____ earth.

Word List:

amoeba

diatoms

microbes

microscope

psuedopod

diatomaceous
