

Equal Group Problems

Directions

In the problems below, use repeated addition and multiplication to find the total number of objects.

Example

Find the total number of legs on these five furry cats.

Repeated addition sentence: $4 + 4 + 4 + 4 + 4 = 20$ legs

There are 5 equal groups of 4.

Now, write the multiplication sentence: $5 \times 4 = 20$ legs

Now you try!

1 Find the total number of petals on the flowers.

Repeated addition sentence: _____

There are 3 equal groups of 5.

Now, write the multiplication sentence: _____

2 Find the total number of pieces of candy in the candy jars.

Addition sentence: _____

There are 6 equal groups of 3.

Now, write the multiplication sentence: _____
