# HOW To DRAW

Drawing an object begins with some basic shapes. Look around and you'll see them in everything.

Squares, Rectangles & Cubes

Circles, Ovals, & Spheres

Triangles, Cones & Pyramids

Use the shapes to draw anything, like this house.

Let's Draw a Butterfly!

Start your drawing with very light pencil lines and darken them later.

Step 1: Start with a long oval and add a small oval on top. This makes the butterfly's body. Add a circle on top of the small oval for the head.

Step 2: Add four large ovals around the body for the wings.

Step 3: Decorate your butterfly with circles, ovals and lines. Add two lines with tiny circles on top for the antennae.

Now you have your drawing. Darken the lines you want to keep and gently erase any you don't want. Your butterfly is ready to be colored.
