

Drawing an object begins with some basic shapes. Look around and you'll see them in everything.

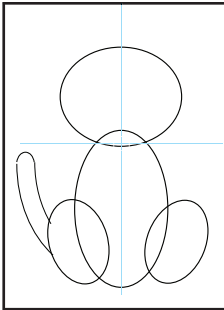

Use the shapes to draw anything, like this house.

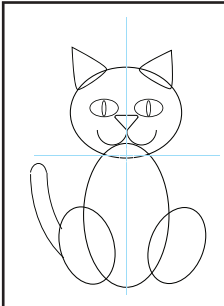

Let's Draw a Cat!

Start your drawing with very light pencil lines and darken them later.

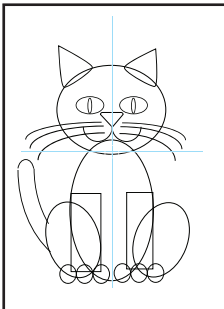

Step 1: Draw an oval for the body. Add two smaller ovals for the back legs. Add a circle on the top for the head. Put a long oval with the bottom cut off for the tail.

Step 2: Add ovals to make eyes. Use triangles for the ears and nose. Two half circles make the mouth.

Step 3: Add curved lines for the whiskers. Use rectangles for the front legs. Put little circles at the end of the rectangles for toes.

Now you have your drawing. Darken the lines you want to keep and gently erase any you don't want. Your cat is ready to be colored.
