

How to Draw a Cone

The **cone** is a 3-D solid. It has a pointy tip called a vertex. A cone has one flat face that is a circle. The rest of the shape is curved.

Let's Practice! Trace the lines to draw the cone below.

2

3

The cone can be used to draw many things. Let's draw an ice cream cone!

<p>Step 1</p> <p>Start with an ellipse.</p> 	<p>Step 2</p> <p>Now draw two straight lines to form the cone.</p> 	<p>Step 3</p> <p>Add a circle for the ice cream.</p> 	<p>Step 4</p> <p>Add lines parallel to the right side of the cone.</p> 
<p>Step 5</p> <p>Add lines parallel to the left side of the cone.</p> 	<p>Step 6</p> <p>Add a small circle to the top of the ice cream.</p> 	<p>Step 7</p> <p>Add a stem to the small circle to turn it into a cherry.</p> 	<p>Step 8</p> <p>Choose a flavor, and color in your ice cream cone.</p>
