

HOW To DRAW

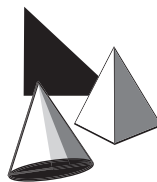

Drawing an object begins with some basic shapes. Look around and you'll see them in everything.

Squares,
Rectangles
& Cubes

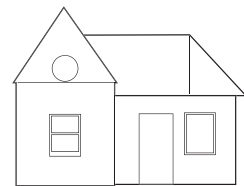

Circles,
Ovals, &
Spheres

Triangles,
Cones &
Pyramids

Curves & lines
to connect the
shapes

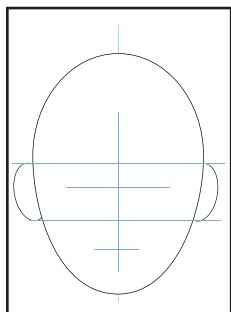

Use the shapes to
draw anything, like
this house.

Let's Draw a Face!

Start your drawing with very light pencil lines and darken them later. Use the light blue lines in the examples as a guide.

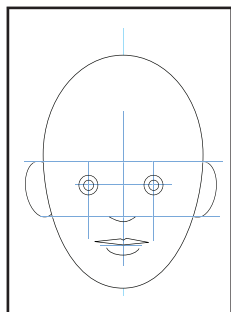

Step 1

Draw an oval that is wider toward the top than at the bottom. Add two half circles on each side for the ears.

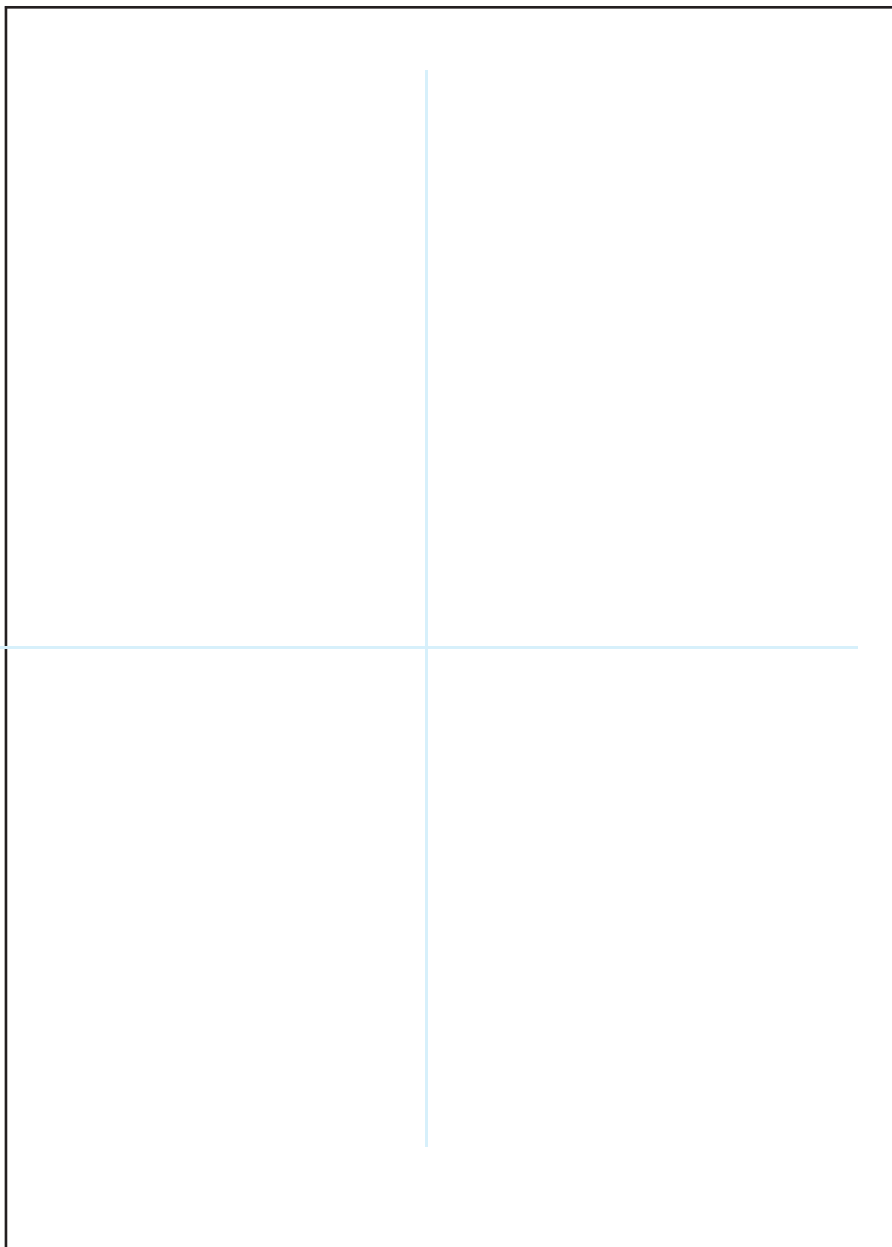

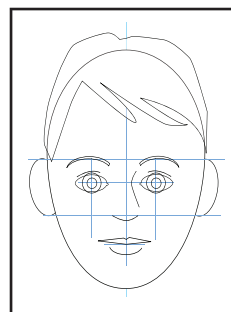

Step 2

Draw two circles for the beginning of the eyes. Add a smaller circle inside each of the eye circles. Draw a small curved line for the bottom of the nose. For the mouth, draw a half oval for the bottom lip. Add a slightly curved triangle for the top lip.

Step 3

Draw the hair with a series of angled lines. Use curved lines for eyebrows. Draw an oval around the eye circles. Place a curved line over the top of the oval to add depth. Add a curved line from the right eye to the nose.

Now you have your drawing. Darken the lines you want to keep and gently erase any you don't want. Your drawing is ready to be colored.
