HUMAN IMPACT: INVASIVE SPECIES

Use this graphic organizer to learn about invasive species and how they impact our environment. Answer the questions below. Conduct research using textbooks or online resources to help you.

What is an invasive species?	What are some ways that human activity can bring an invasive species into an area?

Give an example of an invasive species—plant or animal—found in your area, state, or country.	Where did this invasive species come from? How do scientists think it was able to get to a new area?

What are some of the problems that this invasive species is creating in its new environment?	Write two possible ways to reduce the harm done to the environment by this invasive species.
