

Animal Tracks

While walking through the mountains you may not see any wild animals, but you might see signs that they've been there. Check the soft ground like sand, mud or snow, for animal tracks. Mammals of the dog and cat family walk on four toes. Bears and rodents, like weasles and squirrels, walk on five toes. Some animals have padded paws, some have claws, and others have hooves. These animals all live in the mountains.

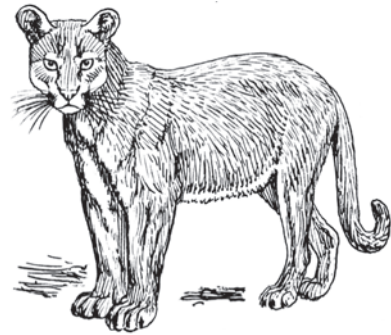

Can you guess which animal left which tracks? Match each animal to its tracks. Write the letter in the box next to the correct tracks.

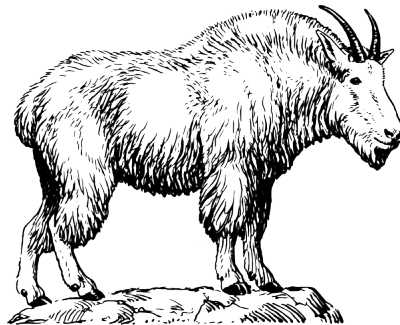

a. Pine Marten

b. Chipmunk

c. Mountain Lion

d. Mountain Goat

e. Grizzly Bear
