Identifying Independent and Dependent Variables

Identify the independent and dependent variables in each problem.
1. The number of students in a class, <i>s</i> , and the number of desks needed, <i>d</i>
Independent variable: Dependent variable:
2. The number of candles on a birthday cake, <i>c</i> , and that person's age, <i>a</i>
Independent variable: Dependent variable:
3. The height of a sunflower in inches, <i>h</i> , and the number of days since it was planted, <i>d</i>
Independent variable: Dependent variable:
4. The number of gallons of paint needed, g, and the size of a room in square feet, s
Independent variable: Dependent variable:
5. The number of eggs Dairus has, <i>e</i> , and the number of batches of muffins he can bake, <i>b</i>
Independent variable: Dependent variable:
6. The amount of money Isabella earns, <i>m</i> , and the number of hours she works, <i>h</i>
Independent variable: Dependent variable:
7. The number of T-shirts a basketball team orders, <i>t</i> , and the number of players on the team, <i>p</i>
Independent variable: Dependent variable:
8. The number of miles Terrance has driven, m , and the amount of gas he has used, g
Independent variable: Dependent variable:
