

IS IT A PHRASE OR A CLAUSE? #2

Phrases and clauses are the grammatical building blocks of sentences. A **clause** is a group of words containing both a subject and a predicate. A clause can be independent, meaning it can stand on its own as a complete sentence, or dependent, meaning it does not express a complete thought.

- **Before Mason left for basketball camp**, he packed his bag with lunch and a cold water bottle.
This dependent clause has a subject (Mason) and a predicate (left for basketball camp), but it isn't a complete thought.
- Because basketball camp was a full-day program, **Mason brought his lunch with him**.
This independent clause has a subject (Mason) and a predicate (brought his lunch), and it could stand alone as a complete sentence.

A **phrase** is a group of words that work together as a unit but without a subject, a predicate, or both.

- Ariana and Megan secured front row seats **for their entire group of friends**.
This phrase does not contain a subject or a predicate.
- **The track team** has a roster with four incredible sprinters, one for each leg of the relay race.
This phrase contains a subject but not a predicate.
- A sea of blue and white, the school's colors, **blanketed the stadium**.
This phrase contains a predicate but not a subject.
