

Which Angle Is It?

A right angle equals 90 degrees.
 An acute angle is less than 90 degrees.
 An obtuse angle is between 90 and 180 degrees.

Look at the angles in the shapes below. Label them as right, acute, or obtuse angles. See the example. Note: If you are unsure whether something is a right angle, take a piece of paper, or a book, and place one of its corners inside that angle. If it fits neatly inside, it is a right angle.

angle ABC right

angle HGE _____

angle EFG _____

angle BCE _____

angle EGH _____

angle GCH _____

angle ECG _____

angle FGE _____

angle AED _____

angle DAB _____
