Skip-Counting
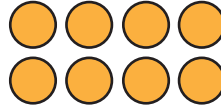

Directions: Use skip-counting as a strategy to multiply the problems on the page.
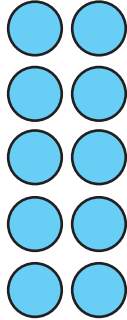

Example:

2 x 4 = $\boxed{8}$
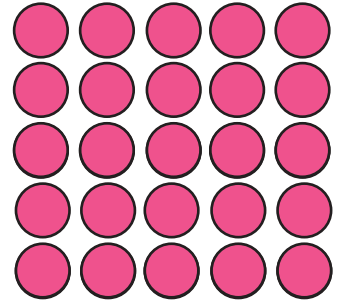

1. Skip-count by five to solve the multiplication problem.
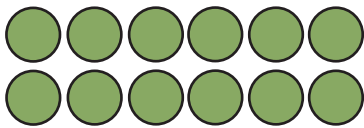

5 x 2 = $\boxed{}$

2. Skip-count by five to solve the multiplication problem.

5 x 5 = $\boxed{}$

3. Skip-count by two to solve the multiplication problem.

2 x 6 = $\boxed{}$

4. Skip-count by ten to solve the multiplication problem.

10 x 3 = $\boxed{}$
