

# Equal Groups Practice

Directions: For each array, separate into equal groups by circling them.  
Write the number sentence that represents the array.

**Example:**

Split these 10 counters into two equal groups.

$$2 \times 5 = 10$$

How many counters are in each group? 5

1. Split these 20 counters into 4 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_

2. Separate these 25 counters into 5 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_

3. Split these 24 counters into 8 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_

4. Separate these 24 counters into 3 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_

5. Split these 12 counters into 4 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_

6. Separate these 18 counters into 9 equal groups.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many counters are in each group? \_\_\_\_\_
