

# Life Cycle of a Mouse

**Mammals** are animals that have fur or hair. They give birth to live young instead of laying an egg. Mammal mothers nurse their young with milk. Mammals are warm-blooded. All mammals have lungs and breathe air. Mice, dogs and humans are all examples of mammals.

Cut out the pictures on page 2 and paste them in the correct order in the life cycle.

# Life Cycle of a Mouse

Baby mice are born blind. They are born **pink** with no hair! As they get older, the baby mice are very **hungry** and eat up to 20 times a day. Mice grow very quickly. They can become adults after just 2 months. As **adults**, mice are good jumpers, climbers and swimmers.
