Measuring Slides

Parker City is getting a new park! Solve the problems below to help them pick the perfect slide.

- 1) Parker City can install a curvy slide that is 12 feet long or a straight slide that is 10 feet long. How much longer is the curvy slide than the straight slide?

- 2) The straight slide (10 feet long) has stairs that take up 2 extra feet. How long are the slide and stairs together?

- 3) The straight slide is 9 feet high and the curvy slide is 7 feet high. How much taller is the straight slide than the curvy slide?
