## Metric Measurement

Take a trip to the candy shop to buy some sweets! Use the chart to convert the measurements, then write your answer in the space provided.

$$
1 \text { gram }(\mathrm{g})=1,000 \text { milligrams }(\mathrm{mg})
$$

$$
1,000 \text { grams }(\mathrm{g})=1 \text { kilogram }(\mathrm{kg})
$$

1. If you have 200 g of gummy bears, how many mg do you have?

2. If you have 1 kg of candied citron, how many mg do you have?

3. If you have 350 g of lollipops, how many mg do you have?

4. If you have $3,750 \mathrm{~g}$ of licorice, how many kg do you have?
$\square$

5. If you have $1,500 \mathrm{~g}$ of taffy, how many kg do you have?

6. If you have $8,000 \mathrm{mg}$ of caramels, how many g do you have?
$\square$
