

Commission #2

Commission is a percentage of the product sale price. If a product sale price is \$100, and the commission is 10%, a salesperson will get \$10 in commission. Find out the commission of each salesperson below.

1. Today Troy sold a \$500 flat screen television and a \$600 refrigerator. The commission for selling a television is 2% and 3% for selling a refrigerator. How much commission did Troy earn today?

2. Peter sold two cars today. The red car costs \$10,000 and he will get 1% commission. The blue car costs \$12,000 and he will get 2% commission. How much commission will Peter get from selling these two cars?

3. Donna sold a boat. The price is \$50,000. Her commission is 0.1%. How much commission will she get?

Challenge

Rosie sold an emerald necklace that cost \$7,500 and she will get 1% commission. She sold ruby earrings that cost \$2,000 and she will get 4% commission. Which piece of jewelry gives her more commission?
