More Fun Finding the Quotient

Division is the process of finding how many times one number will fit into another number.
Division is the opposite, or inverse, operation of multiplication.
$$12 \div 2 = 6$$

dividend   divisor   quotient

quotient

$$\text{divisor} \rightarrow 2\overline{)12} \leftarrow \text{dividend}$$

The number you are dividing is the **dividend.**
The number you are dividing by is the **divisor.**
The answer to a division problem is the **quotient.**

$$16 \div 2 = 8 \qquad 2\overline{)16}$$ 8

Hint: Use your multiplication facts to help you find the answer.

$$2 \times \text{?} = 16$$

The answer is **8**.

1.

$$14 \div 7 = \qquad 7\overline{)14}$$

2.

$$15 \div 5 = \qquad 5\overline{)15}$$

3.

$$12 \div 3 = \qquad 3\overline{)12}$$

4.

$$18 \div 9 = \qquad 9\overline{)18}$$

5.

$$10 \div 2 = \qquad 2\overline{)10}$$

6.

$$21 \div 3 = \qquad 3\overline{)21}$$
