

# Multiplying by the Power of 10

When multiplying a **whole number** by a power of 10, count the number of zeros after the 1, and stick it to the end of the number you are multiplying.

$$\begin{aligned} & 48 \times 10 = 480 \\ & 22 \times 100 = 2,200 \\ & 3 \times 1,000 = 3,000 \end{aligned}$$

To multiply a **decimal** by a power of 10, move the decimal point one place to the right for each 0 after the 1.

$$\begin{aligned} & 0.48 \times 10 = 4.80 \\ & 0.22 \times 100 = 22 \\ & 0.3 \times 1,000 = 300 \end{aligned}$$
