

Build a paper gingerbread house!

Instructions:

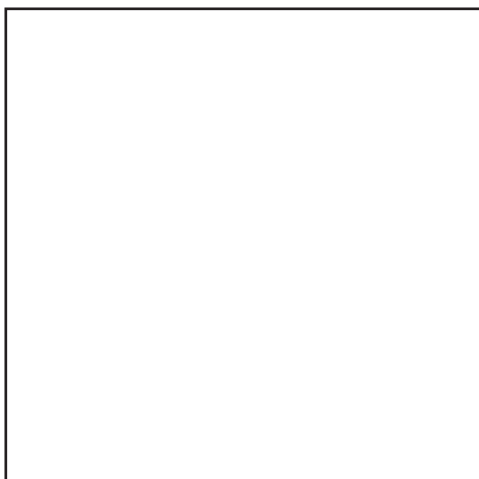

1. Color in the house and the decorations.
2. Cut out the house, base, and roof. Crease along dotted lines.
3. Glue each tab to the spot specified on the tab.
4. Cut out candies, icicles, shrubs, and whichever other decorations you've chosen to use.
5. Glue decorations onto your house.

You can even use glitter glue, stickers, or whatever decorations you like to make your gingerbread house festive. Display your finished house on a shelf, use it as a centerpiece on the holiday table, or give it as a gift!

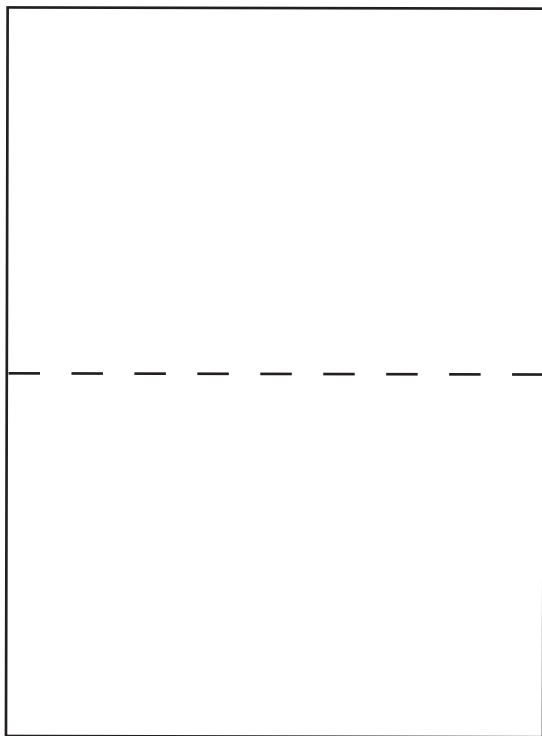

Note: Works best when printed on thick paper!

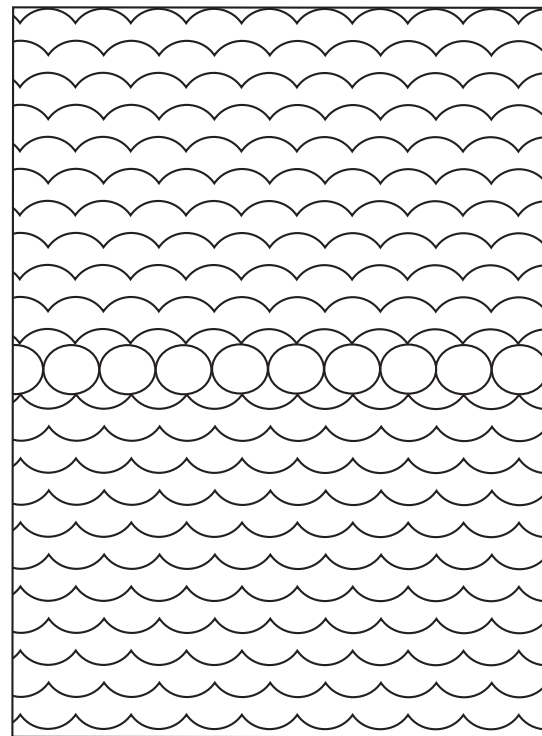

Base: Glue tabs of house to this.

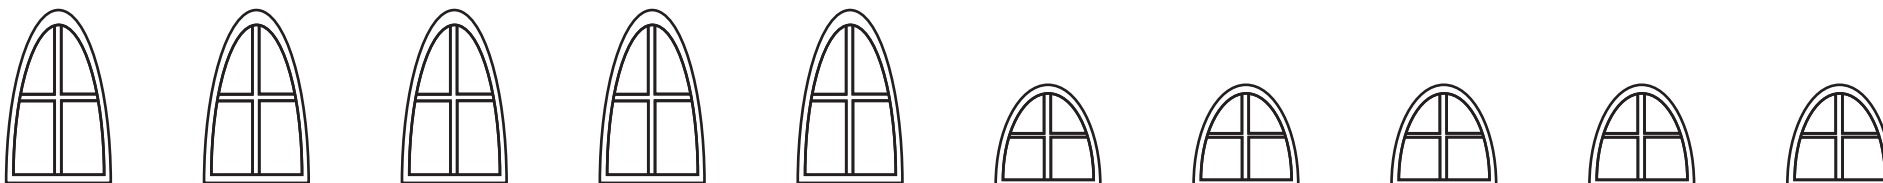

Roof: Cut out and crease along dotted line. Cover with shingles, or decorate with candies.

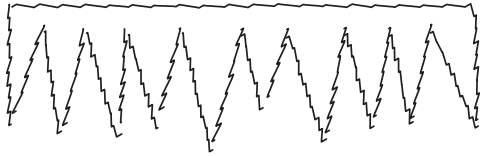

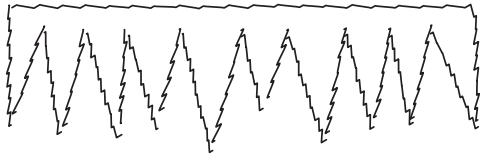

Candy "shingles" for roof: Crease down the middle and glue to top of roof.

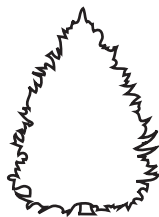

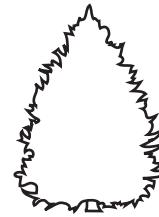

Windows. Cut out and paste to the sides of the house. Use as many or as few windows as you like.

Icicles. Cut out and paste to the eaves of the house.

Shrubs. Line the sides of the house with festive shrubs, place one on each side of the front door, or arrange them however you like.

Candies. Use to decorate the sides of the house, the front door, or the roof of your house.
