

Peer Editing of Student Writing

Using the paragraph below, practice giving the three kinds of feedback discussed in class: compliments, suggestions and corrections. Make **corrections** directly in the text using editing marks. Note your **compliments** in the left hand margin near the text you are referencing and your **suggestions** in the right hand column. Use arrows pointing to text if necessary.

Compliments	Should kids get to use phones in School, like iphones and other kinds? I think that kids should totally be allowed to use cell phones in school. There are so, so many reasons why this is a good idea. They're are powerful learning features on phones, like calculators, language translators and spelling apps. Sometimes parnets need to call kids to relay important messages during the day, plus I just like to check my texts during the day. Some students learn better listening to music and with ear buds, they won't be disturbing others. Phones can be kept on silent during class time so they won't not disrupt the lesson cell phones in school have the potential to help students learn and there aren't many reasons against having phones in school. I love my phone so much!!!!	Suggestions
